Room 25, [Law School](#)

[Business and Human Rights](#)

Professor David Weissbrodt

*on the Occasion of his Re-Appointment as the Fredrikson & Byron
Professor of Law*

Many transnational corporations have budgets larger than nation-states and a supranational reach, unbound globally by any specific polity. Even regional businesses have immense impacts on social welfare and health in the production of goods, provision of employment, innovation, on the one hand, and negatively in unsound labor practices, working conditions and environmental impact, on the other.

Over the past year David Weissbrodt has been working intensively in Geneva on a project developing the application of human rights standards to the business context.

New Board Member Lecture

Monday, April 18, 2005, 12:15-1:15 p.m.
